Our Measuring Services

We offer a professional measuring service to all of our customers (homeowners as well as interior designers). We encourage you to take advantage of this service prior to ordering any custom window treatments.

If we measure your windows, and our measurements are incorrect, we will correct the error at our cost (providing that you order the treatments using only our measurements and that the treatments are installed by one of our installers).

If we do not measure your windows and the window treatments cannot be installed properly because the measurements are incorrect, you will be billed \$50.00 (depending on your location within our service area).

To assist us with providing you with correct measurements, please tell us exactly what type of window treatment you wish to have installed as different products and different manufacturers require different information to fabricate your treatments.
